

STEC

All prices are for factory new equipment installed.

OR

STEC SYS-20 or SYS-40 from \$7961
With 52D54 DG from \$9461

STEC SYS-30 or SYS-50 from \$12304
With 52D54 DG from \$13829

SYSTEM
THIRTY ALT

SYS-30 ALT. Pitch channel add-on to Existing single axis autopilot such as Century I, II, Cessna 300A. This will give the pilot altitude hold.
From \$6843 installed

The STEC sys-30 is the most popular autopilot we install. The SYS-30 provides most single-engine pilots all that they need from an autopilot. The SYS-20 is the SYS-30 less the pitch channel. The STEC SYS-40 and SYS-50 are older systems that have the same basic functionality as the SYS-20 and SYS-30 except that the SYS-40 and SYS-50 will require an additional panel cut out for the controller (where the SYS-20 and 30 are contained in the turn-coordinator. Penn Avionics recommends the GPSS option for the SYS20,30,40, or 50.

For those pilots that require additional capabilities the SYS-55X is the best choice. The major difference between the SYS-30 and the SYS-55X is that the SYS-55X has internal GPSS and the capability to perform command climbs, command descents, and glideslope capture.

SYS-60 PSS. Pitch channel add-on to existing single axis autopilot such as Century I, II, Cessna 300A. This will give the pilot altitude hold, command climbs and glideslope capture.
From \$9702 installed

STEC SYS-55X Full featured two-axis autopilot with GPSS.
From \$19752
Add \$1582 for new DG
Add \$3848 for autotrim
Altitude Pre-select - Call

STEC SYS-60-2: Full featured two axis autopilot without GPSS.
Good choice if aircraft does not have the room for a SYS-55X.
From \$17498
Add \$1582 for new DG
Add \$3848 for autotrim
Altitude Pre-select - Call

GPSS Roll Steering adapter. Allows STEC autopilots to receive digital ARINC 429 steering commands from Garmin or UPS GPS receivers.
From \$2356
